

BLACK EARTH FARMING

"We have over 300,000 hectares of land, now we want three young and extraordinary individuals"

We are looking for YOU if:

- You have a university degree in Agronomy.
- You are between the age of 25 and 35.
- You have a business focused mindset.
- You are willing to spend the largest part of your time in Russia working on enormous fields with the most fertile soil on the planet.
- You have the ambition to pursue an extraordinary career within agriculture.
- You want to take a leading role in the organization that intends to be one of the world's largest agricultural companies.

Work Description

We are looking to hire three individuals to assist the regional production managers in the operations. The position includes:

- Assisting the Regional Managers in the process from planning to execution.
- Be responsible for implementing the operational plans on a local level.
- Train and manage local employees in highly industrial farming.

The business language is English.

Starting date

To be discussed, preferably early 2009.

Black Earth Farming

Black Earth Farming was founded in 2005 with the purpose of acquiring and cultivating land in the Black Earth region in south-west Russia. The company's main owners are Investment AB Kinnevik and Vostok Nafta, two large Swedish companies with extensive experience from eastern Europe as well as agriculture. The company has expanded rapidly and has currently over 300,000 hectares of arable land under its control. During 2008, close to 150,000 hectares are cropped.

When the land was taken into possession, most of it was uncultivated. Extensive investments in machinery with corresponding labour input are in progress to prepare the land for cultivation. The fertile soil and the large areas give opportunities for highly efficient large-scale production.

The company has to today a diverse staff from all around the world. To be able to sustain the rapid growth, efforts are continuously made to recruit top talents from all over Europe.
